IC Card Lock #6600-102

Features :

1. No motor inside the mortise: change the deadly disfigurement of motor rat all.

2. Free rotating handle, prolongs mechanism life the furthest and also avoids unlocking by violence.

3. Change batteries in the lock most easily and safely.

4. Adopt plastic insulated protection on electronic part.

5. Insert the magnetic Card directly into the hole on the front surface.

6. The magnetic reader in one lock. The lock is opened by magnetic card.

Technical Specification

Item#	Description	Technical Parameters
1	Power:	6v(4 segments 1.5 voltage batteries)
2	Static Electric Current:	IC touched card lock ≤ 10μA IC touched card lock+electromagnetic lock ≤ 10μA Reaction card lock ≤ 50μA
3	Working Electric Current:	100-300mA
4	Keeping Record:	250pieces data can be reserved more than 10 years
5	Using Times about Card:	Touched IC card: 100thousand time Reaction card: illimitable times
6	Battery Life:	12 months in normal status
7	Open Time:	5 seconds
8	Insert Reliability:	No mistake even inserted continuously 2000 times
9	Insert Guarantee:	Still work well after inserting any illegal card
10	Low Voltage Warning:	If the CPU working voltage is less than 4.5 V, it will alert "di di" tone with the red light flashing when opening door.
11	Capability Resists Static:	>15000V
12	Relative Range(use):	20%-98%
13	Temperature Range(Using):	-20℃—+70℃
14	Temperature Range(Storage):	-25℃—+85℃
